Course description

The study of biblical Greek represents a great investment for the study of the biblical text, not only for the New Testament but also of the most important translation of the Old Testament, the Septuagint—and for discovering the lives and thought of the earliest Christians.

Taken in sequence, Greek I and II provide an introduction to the basic elements of New Testament Greek. Students will master essential aspects of Greek morphology and syntax and acquire a substantial reading vocabulary. The courses employ both deductive and inductive methods, with increasing emphasis on the latter as students' progress through the year.

By the end of the first semester, students will have mastered first and second declension nouns, pronouns, adjectives, and indicative verbs, and have experience analyzing Greek sentences and simple literary structure. Students will be expected to use audio recordings and practice listening to and reading Greek aloud, as well as writing Greek both by hand and using a word processor with Greek fonts.

The course offers an introduction to the language of the New Testament - koine Greek. It is taught intensively, with three contact hours per week, and covers both grammar and vocabulary. Passages from the Greek New Testament are introduced from the very beginning, and by the end of the course students will be able to tackle simple passages themselves.

STUDENT LEARNING GOALS:

Upon successfully completing these two courses, the student will have demonstrated:

1. Ability to analyze (parse) Greek nouns, pronouns, adjectives and verbs.

2. Ability of Reading Greek sentences, and writing Greek script both by hand and using Greek fonts in a word processor.

4. Ability to analyze and translate New Testament Greek passages with some helps provided.

5. Acquisition of a basic New Testament Greek vocabulary.

COURSE REQUIREMENTS AND POLICIES:

Our work will proceed on a weekly cycle, with each week covering particular textbook lessons(s) and/or reviews. A semester will have 16 weeks.**all assignments must be submitted on time and cannot be revisited after their due date**.

All work other than quizzes and the final exam will be open book and open notes; students are encouraged to help one another, ask questions in class or whatever else you want to do to help

your understanding. You are welcome, for LXX and NT exercises, to consult an English Geez and Amharic translation.

The final exam will consist of translating a passage from the Greek New Testament, with some words underlined to be parsed. Some helps will be provided for the more difficult words or grammatical structures.

STUDENT EVALUATION (**Assessment Methods)**

The instructor will make every effort to give students timely feedback as we go through the course, and students are encouraged to help one another whenever possible in every social medias (like telegram whatsup, messenger etc).

Our primary goal is to learn as much New Testament Greek as possible, and to learn how to learn NT Greek; anyone who applies him or herself to that task should have no trouble passing the course.

Evaluation: Weekly written assignments, frequent closed-book quizzes, mid-term translation project, proctored final exam.

Main Texts:

Introduction

What is language? It is the means by which thought is communicated from one mind to another, or, from the converse viewpoint, the means by which one mind is enabled to think with another. "Language may be defined as the expression of thought by means of speech-sounds"

The term "speech-sounds" can be made to include both spoken and written language, for written language is but a system of symbols which represent spoken sounds. But there is another type of thought-expression which we know as sign-language. This is produced by gesture, and while not nearly so accurate or convenient as speech-language, it is nevertheless language, for it expresses thought. Consequently a more adequate definition is that of Whitney: "Language . . . signifies . . . certain instrumentalities whereby men consciously and with intention represent their thought, to the end, chiefly, of making it known to other men: it is expression for the sake of communication"

Then, essentially, language is a system of symbols which represent thought.

The Greek Language

The Greek language belongs to the Indo-European family of languages. The name "Indo-European" indicates the geographic area where these languages were originally spoken. The family includes most of the languages spoken in Europe, as well as those spoken as far east as ancient Persia, Afghanistan, and India. By the careful comparison of vocabulary, morphology, and syntax, scholars have shown that all these languages descended from a common ancestor that is called either **Indo-European** (IE) or **Proto-Indo-European** (PIE), which was probably spoken some time in the fifth millenium B.C.E. The people who spoke this original language are supposed to have gradually dispersed throughout Europe, Asia, and India, and the language over time changed differently in different places until the variety of languages belonging to this family gradually appeared.

The modern historical method as applied to all phases of linguistic science is to investigate a language in the light of all the periods of its own history, and its relationship to all kindred languages. This investigation of linguistic kinship and development is known as the science of comparative philology. No really informed student now attempts the study of any language without the use of this comparative method. Consequently we should approach the study of New Testament Greek by considering its relation to the other representatives of human speech, and the stages of its own development. It will be of value to the student to become acquainted especially with the relation of the Greek to those languages nearest it in kinship, and in general with the entire scope of linguistic development.

The languages of mankind may be divided into families, the families into branches, and the branches into dialects. However, it will be necessary here to offer complete analysis only of the family to which the Greek belongs. And indeed, the family to which the Greek belongs submits itself most readily to thorough analysis, for it is the most highly developed, and at the same time the most clearly defined of all languages. Besides its designation as Indo-European, it is sometimes called Indo-Germanic, or Aryan. Of these three designations the last is the most convenient, but may be confusing because so often restricted to the Asiatic dialects of the family; the second is undesirable because it gives an exaggerated prominence to the German language; the one here used, though rather clumsy, is by far the most accurately descriptive.

- Biblical Greek represents one of the most valuable skills a person can develop for studying the Bible.
- The Greek of the New Testament and Septuagint (a translation of the Old Testament into Greek) is known as Koine Greek.
- "Koine" is a Greek word that means "common."
- After Alexander the Great spread Greek language and culture throughout the known world, this Common Greek became the language of wider communication for the entire Greco-Roman world.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- Learning Koine Greek not only connects you to the original text of the New Testament but also to the Septuagint (that the writers of the New Testament quoted regularly), as well as to the cultural, social, and historical world in which the good news of the gospel spread.
-
- The form of Greek used by writers from Homer (the *Iliad* and the *Odyssey*) about 700 BC to Plato (*The Republic*) in 360 BC, is called **Classical** Greek.

- There were three dialects to classical Greek, Doric, Aeolic, and Ionic (of which Attic is a derivation).

- Alexander the Great, who was tutored by Aristotle, spoke Attic Greek and conquered the East, spreading the Greek language throughout the Mediterranean world and beyond. Thus began the **Hellenistic Age**.

- Hebrew Scripture was translated into Greek in Alexandria and became known as the *Greek Septuagint*.
- A common Greek language arose among the people and became known as **Koine** Greek (**κοινή**, the word meaning "common").
- Greek in the Holy Land was heavily interpenetrated by native Semitic languages, such as *Aramaic* and *Hebrew*.
- This likely explains the variant spellings in the Greek New Testament for words such as *Jerusalem* (Ἰερουσαλήμ, Ἰεροσόλυμα), *Nazareth* (Ναζαρὰ, Ναζαρέτ, Ναζαρὲθ), and *Nazarene* (Ναζαρηνέ, Ναζωραῖος).
- *No original manuscript by the author of a biblical book has yet been uncovered!*
- Koine Greek was the language used by writers of the Old Testament Greek Septuagint and the Greek New Testament.
- The original Greek New Testament was written in all capital letters, without spaces, punctuation, accents or diacritical marks.

Different Periods of the Greek Language

1.	**Proto-Greek: Linear B (prior to 1200 B.C.)**
2.	**Classical Greek: 1200 – 333 B.C.**
3.	**Koine Greek: 333 – 330 A.D.**
4.	**Byzantine Period: 330 – 1453.**
5.	**Modern Period: 1453 to present**

Chapter One

The Greek Alphabet

- It is helpful to have knowledge of the Greek alphabet and language to appreciate the nuances of meaning in the Greek Septuagint Old Testament and the Greek New Testament of the Bible. Reading the Greek text allows one to capture the full impact of what the Gospel writer is hoping to convey in his narrative.

- The Greek alphabet was derived from the Phoenician **alphabet**. Phoenicia (now Lebanon) was a peaceful sea-faring nation expert in navigation and trade that developed their alphabet around 1400 BC in an effort to communicate with their diverse trading partners that encircled the Mediterranean Sea.

- It was the Phoenician alphabet that was widely received and readily adapted in Greece and throughout the Mediterranean, as it was only 22 letters based on sound, as opposed to the myriad of symbols in cuneiform and hieroglyphics prevalent at the time.

- There's no difference between a biblical Greek alphabet and the modern Greek alphabet. Therefore, you'll want to learn both how it's printed in modern fonts as well as how to handwrite it.
- The Greek alphabet contains **24** letters.

Greek Letters pronunciation

- Much ink has been spilled over the years over what "the best" pronunciation for Greek should be for students of the New Testament.
- Some people prefer **Modern Greek** because of its strong connection to the living Greek language.
- Others maintain that **the traditional Anglicized Erasmian pronunciations** used in most seminaries have more practical value for interacting with other Greek students.
- Finally, some people also choose to use **a historically reconstructed pronunciation** to accurately speak and read the language the way it would have sounded to the writers of the New Testament period.
- None of these three choices is wrong or worse than the other.
- They simply prioritize different values.
- Whatever you choose, learning the letters of the alphabet doesn't need to be difficult. You can hear what the alphabet sounds like in each of them.

Different Properties of the Greek Letters

⌘ Capital letters today are used only for proper names, the beginning of paragraphs, and the first word of a quotation.

⌘ Please note that the letter **sigma** has two forms **σ** and **ς**, the second form **ς** occurring at the end of a word.

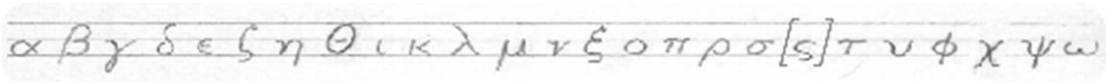

⌘ There are three letters that may especially confuse you, η, ν, and **ϱ**. Note well that η does **not** correspond to **n** Rather, ν corresponds to **n**. Also note that **ϱ** is **not** a **p.**

⌘ Note that some English consonants are not represented in the ancient Greek alphabet, such as *j*, *v*, and *w*. Other sounds, such as “sh” in “shop” and “ch” in “chips,” are also impossible to render precisely in the Greek alphabet!

How to write the Greek letters

- When writing the letters, you don't need to perfectly emulate the printed font in the text book.
- Compare the machine produced characters with the hand written characters below:

α β γ δ ε ζ η θ ι κ λ μ ν ξ ο π ρ σ [ς] τ υ φ χ ψ ω

- Inscriptions of the classical period show that at that time Greek was written entirely in capital letters, with no spaces between the words.
- The use of the lower-case cursive letters developed gradually.
- Another feature of Greek writing in books printed today is that when there is a long diphthong ending in /i/, as in ᾳ, ῃ, ῳ (*āi, ēi, ōi*) /aːi̯ ɛːi̯ ɔːi̯/, the iota is written under the long vowel, as in τύχῃ (*túkhēi*) "by chance".

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- This is known as iota subscript.
- When the main letter is capitalized, the iota can be written alongside instead, as in Ἅιδης (*Háidēs*) "Hades"; this is known as iota adscript.
- It is a convention in Ancient Greek texts that a capital letter is not written at the beginning of a sentence (except in some texts to indicate the beginning of direct speech).
- However, capital letters are used for the initial letter of names.
- Where a name starts with a rough breathing, as in Ἑρμῆς (*Hermês*) "Hermes", it is the initial vowel, not the breathing, which is made capital.
- Another convention of writing Greek is that the sound *ng* [ŋ] in the consonant clusters /ng/, /nk/ and /nkʰ/ is written with a gamma: γγ, γκ, γχ (*ng, nk, nkh*), as in ἄγγελος (*ángelos*) "messenger", ἀνάγκη (*anánkē*) "necessity", τυγχάνει (*tunkhánei*) "it happens (to be)".
- The lower-case letter Σ (*S*) ("sigma") is written ς (*s*) at the end of a word, otherwise σ (*s*), e.g. σοφός (*sophós*) "wise", ἐσμέν (*esmén*) "we are".

Consonants

- The 24 letters of the Greek alphabet are divided into two parts.
  - The vowels (φωνηεντα)
  - The consonants (συμφωνα).

    There are 7 vowels and 17 consonants. They are:

Vowels (Φωνηεντα):	α, ε, η, ι, υ, ο, ω.
Consonants (Συμφωνα):	β, γ, δ, ζ, θ, κ, λ, μ, ν, ξ, π, ρ, σ, τ, φ, χ, ψ.

Vowels

- A major contribution of Greek culture was the addition of **vowels** to the development of our alphabet. Vowels are formed by unimpeded airflow through the airway when the vowel sound is produced.
- The seven Greek vowels are **α** - alpha, **ε** - epsilon, **η** - eta, **ι** - iota, **ο** - omicron, **υ** - upsilon, and **ω** - omega.
- Of the seven **vowels**, two vowels, **η** - **eta**, and **ω** - **omega** are always long; two vowels, **ε** - **epsilon**, and **ο** - **omicron** are always short; and three vowels can be either long or short: **α** - **alpha**, **ι** - **iota**, and **υ** - **upsilon**. Long vowels take approximately twice as long to pronounce as short vowels.

Iota Subscript

- When short iota follows the long vowels alpha, eta, and omega (in lower case), the iota is written beneath them as an **iota subscript**, and appears as **ᾳ**, **ῃ**, or **ῳ**.

  This may occur in the dative singular.

  When this is seen, the iota is not pronounced.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Diphthong

- A **diphthong** is a pair of vowels that make one sound, as we have in English: aisle, neighbor, oil, jaunt, though.

- The following are diphthongs:
  - αι, ει, οι, αυ, ευ, ηυ, ου
- In addition to these, there are three "**improper dipthongs**," diphthongs wherein the second vowel, ι, is written as a subscript to the first letter.
- These are ᾳ, ῃ, ῳ (named respectively, "*alpha iota subscript*," "*eta iota subscript*," "*omega iota subscript*")
- Finally, there is **one exception** to the rule that the first vowel must be an open vowel. Even though υ is a close vowel, υι is a diphthong.
- Although a diphthong is a combination of two sounds with one sliding into the other, for purposes of syllabification, a diphthong is considered to be **one vowel sound**.
- Contrast the ***oi* in Illinois** with the ***io* in Ohio**.
  - The ***i*** and ***o*** in Oh**io** are clearly two distinct sounds. But the ***oi*** in Illin**oi**s is a diphthong and makes one vowel sound.
- The second vowel is always an *ι* or *υ*.
- Diphthongs are **always long**, except final αι and final οι.

For example:

- οι in ἄνθρωποι is final and is short.
  οι in ἀνθρώποις is not final (it is followed by ς) and is long.

Accents and Breathing Marks

- Ancient Greeks, of course, knew how to pronounce their own words.
- When large numbers of foreigners (ξένοι) started learning Greek in antiquity, Greek scholars developed additional symbols to help non-Greeks speak the language.
- These additional marks have since remained part of the spelling conventions, or orthography, of each word.
- As a result, ancient Greek is considered a POLYTONIC – "many accents" – writing system.
- There are **<u>three classes of additional marks:</u>**

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

1. Breathing marks
2. Accent marks
3. Punctuation marks

Breathing

- Classical Greek does not use a separate letter for the *h*, or aspirated breathing sound.
- You will recall, for example, that the aspirated versions of π, τ, and κ are represented by different letter forms: φ, θ, and χ.
- In some cases, the "h" breathing sound was also applied to the BEGINNING of a number of Greek words, all of which begin with a vowel, diphthong, or the letter ρ.
- For words that begin with a vowel or diphthong, there are two symbols that indicate the presence or lack of aspiration: a SMOOTH BREATHING mark indicates no aspiration, and a ROUGH BREATHING mark indicates aspiration .
- In the case of the consonant ρ, it always receives ROUGH BREATHING when found at the BEGINNING of a word.
- This phenomenon is reflected in the spelling of English words of Greek origin, such as *rhetoric* and *rhythm*.
- If ρ is found within or at the end of a word, no breathing mark is applied.

For single vowels and the consonant ρ, the marks are placed directly above the lower case letters (e.g. ὁ and ῥ), and immediately to the left of capital letters (e.g. Ὅ and Ῥ). If placed over a DIPHTHONG, the mark is always above the SECOND vowel (e.g. οἱ, εἰ, and Εὐρώπη).

Every Biblical Greek word that begins with a vowel takes a **breathing mark**, either rough or smooth.

- Greek has an **h** sound, which occurs only at the beginning of some words, and is expressed by the *rough breathing mark* ῾.
- The rough breathing mark is placed above the initial vowel of a word and pronounced before the vowel sound.
- When a word is capitalized, the rough breathing is written before the initial vowel.
- Every word that begins with rho or an upsilon takes a rough breathing mark, but the h is generally not pronounced with rho (as in English - rhetoric).
- In words that begin with a vowel and lack an h sound, the absence of the h is represented by the *smooth breathing mark* ᾽.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- In words that begin with a diphthong, the breathing mark is placed over the second vowel of the diphthong.
- When a word begins with a diphthong, the breathing mark goes over second letter. For example αὐτός

Syllables

- A Greek word has as many syllables as it has separate vowels or diphthongs.
- A Syllable is *long* by nature when it has a long vowel or diphthong.
- In dividing a word into syllables, single consonants and combinations of consonants which can begin a word are, with few exceptions, placed at the beginning of the syllable; other combinations of consonants are divided.
- Thus φο-βε-ρός, *frightful* ὁ-πλῑ-της, *hoplite*, but ἁρ-πά-ζω, *I plunder*.

Elision

- A short final vowel may be dropped when the next word begins with a vowel, whether this has the rough or the smooth breathing. This is called elision.
- An apostrophe marks the omission. Thus ἐπ'αὐτόν, *against him*, for ἐπι αὐτόν.
- Most words ending in σι, and all the verbs of the third person ending in ε, generally add ν, when the next word begins with a vowel, as ἔχυοσιν οἰκίᾱς, *they have houses* εἶχεν οἰκίᾱν, *he had a house*. This is called ν movable. It may also be added at the end of a sentence

Accent

- There are three accents:

1. the acute (΄), as ἀ-γα-θός, *good* ἡ-μέ-ρα, *day* Ἄρ-τε-μις, *Artemis*, ᾤ-κη-σα, *I dwelt;*
2. the grave (`), as σκη–ναὶ ἀ-γα-θαι, *good tents*;
3. The circumflex (˜), as σκη-νῆς, *of a tent* ὦ–δε, *thus* ἐν σκη-ναῖς, *in tents*.

- The acute can stand only on one of the last three syllables of a word, the circumflex only on one of the last two, and the grave only on the last.
  - The last syllable in a word is called the ultima,
  - the second to last syllable is called the penult,
  - The syllable before the penult is called the antepenult.

- The circumflex can stand only on a long syllable. When long ᾱ, ῑ, ῡ have the circumflex, the long mark is omitted, and they are written ᾶ, ῖ, ῦ.
- The antepenult, if accented, takes the acute, as ἄν-θρω-πος, *man*; but it can have no accent if the last syllable is long or ends in ξ or ψ, as ἀ-νθρώ-που, *of a man*.
- An accented penult is circumflexed when it is long while the last syllable is short, as δῶ-ρον, *gift*, Otherwise; it takes the acute, as δώ–ρου, *of a gift*, χώ-ρᾱ, *land, country*.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- Final αι and οι are counted as short in determining the accent, as ἀ-μα-ξαι, *wagons* χῶ-ραι, *lands*, except in the optative, and the adverb οἴ-κοι, *at home*.
- An accented ultima has the acute when short, as ἀ-γα-θός, *good*; the acute or circumflex when long, as σκη-νή, *tent*, σκη-νῆς, *of a tent*.
- A word which, like σκη–νή, *tent*, has the acute on the last syllable is called the oxytone (i.e. sharp-tones). An oxytone changes its acute to the grave before other words in the same sentence, as σκη–νὴ ἀ-γα-θη, *a good tent*.
- Some monosyllables have no accent and are closely attached to the following word, as ἐν σκη-νῇ, *in a tent*. These are called proclitics.
- An enclitic is a word which loses its own accent and is pronounced as if it were part of the preceding word, as ᾽ἄν-θρω-ποι τε.

Three Accents

1. Acute (´) angles upward (left to right), originally indicating a rising pitch. Today we use the accents to specify syllable emphasis, not tone or pitch variation.
   λέγω (I say)
2. Grave (`) angles downward, originally indicating a falling pitch.
   ἀδελφὸς (brother)
3. Circumflex (῀) angles upward then downward, originally indicating a rising then falling pitch.
   αὐτοῦ (his)

The rule of contraction

Contraction

When two vowels or a vowel and diphthong come together in adjoining syllables they usually blend into a single syllable. Thus *γένε-os* becomes *γένους*; *ἐφίλε-ε* becomes *ἐφίλει*.

- A sign similar to a smooth breathing, called a coronis is used to show when two words have joined together by a process called crasis ("mixing"),

e.g. κᾀγώ (*kāgṓ*) "I too", contracted from καὶ ἐγώ (*kaì egṓ*).

Punctuation in Greek

The Greek uses the comma and period as in English. It also has a colon, (·) a point above the line, which is equivalent to the English colon and semicolon. The mark of interrogation is (;), it is the same as the English semicolon. So in Greek, ";" is equal to the English "?". Thus:

1. A **period** is represented in Greek by a **period**.
2. A **question mark** is represented in Greek by a **semicolon**.
3. A **colon** or a **semicolon** is represented in Greek by a **dot above the line**.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Two punctuation marks are used in Greek texts which are not found in English:

- the colon, which consists of a dot raised above the line (·) and
- the Greek question-mark, which looks like the English semicolon (;).

Here please do exercise 1 and 2

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Chapter Two

Greek Words

Reading Greek

- There are almost ***no silent letters*** in Greek. Nearly every letter is to be pronounced cleanly and clearly.
- ***No exotic accent*** is required or encouraged. There's no need to sound ancient, or Mediterranean, or sophisticated.
- The pronunciation of Greek letters is ***consistent*** from word to word. No nightmares like the English "-ough-," which is pronounced differently in each of the following: cough, though, tough, bough, thought, and through.

Now it's time to get to work! Push your way through the alphabet chart carefully, repeatedly, and aloud. A solid hour spent here will get you on the right track, giving your eyes, ears and mind sufficient time to absorb the new reality of the Greek alphabet. Remember that a pathway through the woods is made only by repeatedly traveling in the same groove over time.

To pronounce a word,

- First, count the number of vowels
- Then, where there are two or more vowels in succession, identify pairs of vowels that form diphthongs
- Next, counting each diphthong as one vowel sound, and every other vowel as a vowel sound, count the total number of vowel sounds. This is the number of syllables in the word.
- Pronounce the syllables, syllable by syllable
- Identify the syllable that has an accent mark indicating that syllable should be stressed.
- Pronounce the whole word, stressing the accented syllable.

Example: θεραπεύω

Different Properties of Greek Words

- ♣ Greek is written from left to right as Latin, the Romance and English languages.
- ♣ The Greek language is characterized by a high degree of *inflection*. Each Greek word actually changes form (inflection) based upon the role that it plays in the sentence.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Quick Review of English Grammar
Parts of Speech

1. *Noun* names a person, place, thing or idea (e.g., book).
2. *Adjective* is a word used to qualify the meaning of the noun (e.g., good book).
3. *Definite Article* is a word that specifies a particular noun (e.g., the book). The indefinite article is "a."
4. *Pronoun* is a word used instead of a noun (e.g., the book, it).
5. *Preposition* is a relational word that connects an object (often a noun) to its antecedent (e.g., in the book).
6. *Verb* is often an action or state-of-being word that makes a statement, asks a question, or gives a command (e.g., read).
7. *Adverb* qualifies the meaning of the verb (e.g., read quickly).
8. *Particle* is indeclinable and assists in expressing the meaning of the sentence.

Basic Grammar of New Testament Greek

- Learning a language, especially for the purpose of Bible study, makes grammar resources essential.
- Introductory grammars guide you through the basics and present the paradigms and details you need to understand basic sentences.
- They provide a foundation for basic concepts and vocabulary so that you can start your journey into the text of the New Testament.
- Intermediate and advanced grammars, then, become essential for understanding difficult topics, finding answers to questions, and making wise decisions for how complex or ambiguous Greek phrases and sentences should be interpreted.
- **Ancient Greek grammar** is morphologically complex and preserves several features of Proto-Indo-European morphology. Nouns, adjectives, pronouns, articles, numerals and especially verbs are all highly inflected.
- Another complication of Greek grammar is that different Greek authors wrote in different dialects, all of which have slightly different grammatical forms.For example, the history of Herodotus and medical works of Hippocrates are written in Ionic, the poems of Sappho in Aeolic, and the odes of Pindar in Doric; the poems of Homer are written in a mixed dialect, mostly Ionic, with many archaic and poetic forms.
- The grammar of Koine Greek (the Greek lingua franca spoken in the Hellenistic and later periods) also differs slightly from classical Greek.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Greek lexicons

- Vocabulary is a foundational part of learning a language, but there will always be words you don't recognize.
- Sometimes, the historical or cultural context will influence how a word is used in ways that you might not expect.
- Other times, you might simply have trouble recognizing a particular form of a word.
- Or perhaps you need to look up a word that does not appear in the New Testament.
- There are different kinds of lexicons to anticipate these kinds of needs.

Parts of Speech in Greek

- ϕ By parts of speech we mean the various classes under which all words used in speaking and writing may be arranged.
- ϕ Greek words are two types: Changing and Unchanging Words or those which can be declined and those which can not be declined.
- ϕ The part of the word which contains the basic idea is known as **the Stem**.
- ϕ Modifications of the basic idea are introduced by means of changes of form which are known as **inflections.**
- ϕ The study of the form of words is known as **morphology (accidence)**
- ϕ The study of the arrangement of words in the sentence is known as **syntax.**
- ϕ In the early stages of Greek the **learning of the inflections** is the student's main task.

The following are parts of speech in Greek:

1. **Articles** are declined
2. **Nouns** are declined
3. **Pronouns** are declined
4. **Adjectives** are declined
5. **Infinitives** are declined
6. **Verbs** are conjugated
7. **Particples** are declined
8. **Adverbs** are not declined
9. **Preposions** are not declined
10. **Conjunctions** are not declined
11. **Interjections** are not declined

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

The Greek Article

The Definite Article

- The DEFINITE ARTICLE, translated as ***the*** in English, is far and away the most common word in Greek.
- Greek, however, uses the definite article in more varied ways than does English. For example, proper names are often accompanied by a definite article: *Socrates is good* (ἀγαθός), for example, would be rendered in Greek as ὁ Σωκράτης ἐστὶν ἀγαθός.
    - Other uses of the Greek definite article will be treated in later lessons. For now, it is good to assume that unless there is some reason to omit it, the Greek definite article regularly accompanies nouns.
    - Like nouns, the definite article in Greek has three genders.
    - For each, there are eight forms to cover the two numbers (singular and plural) and four cases (nominative, genitive, and dative, accusative).
    - When a definite article accompanies a noun, both must parse the same. In other words, they must be the same in gender, number and case.

Nouns

- According to *Webster's Dictionary,* a noun is: *any member of a class of words that typically can be combined with determiners to serve as the subject of a verb, can be interpreted as singular or plural, can be replaced with a pronoun, and refer to an entity, quality, state, action, or concept.*
- Nouns are an important part of any Greek sentence. They can change form depending on which case they are in the sentence (such as nominative or accusative).
- Nouns are an important part of any Greek sentence. They can change form depending on which case they are in the sentence (such as nominative or accusative). In the following examples, the nouns are boldfaced:

Nouns are parts of speech which are inflected for four cases, besides a case of address called the vocative in Greek. The cases are as follows:

- **Nominative**, the case of the subject;
- **Genitive**, the case to indicate possession -- possessive, in grammars of English
- **Dative**, the case of the indirect object
- **Accusative**, the case of the direct object -- objective, in grammars of English

Case forms may also be determined by prepositions.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

In English, only the nominative, genitive/possessive and accusative/objective have been maintained, and that only in pronouns: *I* is nominative, *my* is genitive, *me* is accusative. Nouns simply have a nominative and a possessive, as in *dog, dog's*. Adjectives are not inflected.

Greek nouns are inflected for --

- number, that is, **singular** and **plural**; Classical Greek also maintained a **dual**.
- three genders: **masculine**, **feminine**, and **neuter**.
- a large number of declensions.

Paradigms are given in the various lessons.

For illustration here, forms of the article are shown in all three genders, as well as the feminine noun for 'country' of the α-declension and the masculine noun for 'word' and the neuter for 'gift' of the o-declension:

		Fem.		Masc.		Nt.		Fem.		Masc		Nt
Sg. Nom.		ἡ		ὁ		τό		χώρα		λόγος		δῶρον
Sg. Gen.		τῆς		τοῦ		τοῦ		χώρᾱς		λόγου		Δώρου
Sg. Dat.		τῇ		τῷ		τῷ		χώρᾳ		λόγῳ		δώρῳ
Sg. Acc.		Τήν		Τόν		τό		χώρᾱν		λόγον		δῶρον
Pl. Nom.		αἱ		οἱ		τά		χῶραι		λόγοι		δῶρα
Pl. Gen.		τῶν		τῶν		τῶν		χωρῶν		λόγων		Δώρων
Pl. Dat.		ταῖς		τοῖς		τοῖς		χώραις		λόγοις		Δώροις
Pl. Acc		Τάς		Τούς		τά		χώρας		λόγους		δῶρα

♣ A Greek **noun** is composed of the *stem*, which conveys the meaning, and the *case ending*. The inflection of a noun is called its *declension*, and nouns are declined.

♣ There are three patterns of declension to Greek nouns: stems ending in alpha or eta are in the first declension, those ending in omicron are second declension, and stems ending in a consonant are third declension.

♣ Case endings are the way the Greek language designates the function of a noun (nominative, accusative, genitive, dative, vocative), the gender (masculine, feminine, or neuter), and the number (singular or plural).

♣ Case marks the relationship of the noun to the verb. Word order in Greek is primarily used for emphasis, balance, contrast, or variety.

For example,

1. When **Κύριος**, the Greek word for **Lord**, is the subject (nominative case), as "the Lord blessed the crowd," the word keeps its lexical form as above and is spelled in transliteration as Kyrios.
2. When the Lord is possessive (genitive case), as "the Lord's supper or the Lord's prayer," the word is spelled *Κύριου*.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

3. When the Lord is the indirect object (dative case), as "Philip brought bread to the Lord," it is spelled as Kyrioi; the omicron lengthens to omega, and the iota subscripts in the dative singular, to form *Κυρίῳ*.
4. When the Lord is the direct object (accusative case), as "the Father sent the Lord," it is spelled *Κύριον*.
5. When the Lord is addressed (vocative case), as "Lord, Lord, please forgive me," the word is spelled *Κύριε*, as in the hymnal *Kyrie Eleison*.

The following chart lists the case endings for *Κύριος*, a second declension noun in the masculine singular. Thus in the second Biblical passage from the Letter of St. Paul to the Romans, Lord must be the direct object or in the accusative case.

LORD

Case	Ending	Spelling	Example
Nominative	-ς	Κύριος	John 20:28
Genitive	-υ	Κυρίου	Philippians 3:8
Dative	-ι	Κυρίῳ	Philemon 1:16
Accusative	-ν	Κύριον	Acts 2:36
Vocative	-ε	Κύριε	Luke 18:41

Declining Nouns

2		1		2	
λόγος	(word: Subject)	γραφή	(writing: Subject)	ἱερόν	(temple: Subject)
λόγου	(of a word)	γραφῆς	(of a writing)	ἱεροῦ	(of a temple)

I. GENDER indicates the class or category of nouns to which a given noun belongs.

Most Greek nouns are assigned one of three GRAMMATICAL GENDERS:

- Masculine
- Feminine
- Neuter

In some cases, the grammatical gender of a particular noun reflects the actual gender of a person or animal. In other cases, the gender of a noun is simply grammatical. This is perhaps clearest with the gender of nouns that are inanimate objects, but there are also nouns that possess an unanticipated grammatical gender.

For example, ἀνδρεία, *manliness*, is a grammatically FEMININE noun. Learning the gender of each noun is therefore essential, and must be memorized as part of the vocabulary entry.

II. NUMBER indicates whether a noun is singular or plural.

As with English, Greek nouns change their endings to reflect a noun's number. Also like English, Greek has two numbers:

- Singular
- Plural

Unlike English, Greek also has a third number: DUAL (!), which indicates a pair of something. More often, however, Greek simply uses the plural to indicate a pair of something: As a result, the dual number is rare in Greek. For this lesson, we concentrate on the far more common singular and plural.

III. CASE indicates the noun's function in a particular sentence.

Greek most often uses the following four cases:

- Nominative
- Genitive
- Dative
- Accusative

Each of these cases represents a wide range of possible information about how the noun is to be understood within the context of a given sentence. What follows are some of the most common functions for each case.

NOMINATIVE

Nouns in this case most often function as the subject of a verb, or as a predicate nominative.

- *Mary sends the child of Joseph to the rulers*. (Subject of verb).
- *She is Mary*. (Predicate nominative).

GENITIVE

Nouns in this case often communicate the same function expressed by the English word *of*. It is used, for example, to denote possession.

- *Mary sends the child of Joseph to the rulers.*

DATIVE

Nouns in this case often communicate the same function expressed by the English words *to* or *for*. It is used, for example, to denote an indirect object.

- *Mary sends the child of Joseph to the rulers.*

ACCUSATIVE

Nouns in this case often function as the direct object of transitive verbs.

- *Mary sends the child of Joseph to the rulers.*

Summary of Cases and Their Basic Functions

Case Name	*Used to Express*
Nominative	1. subject 2. predicate nominative
Genitive	1. "of" 2. "from"
Dative	1. "to," "for" 2. "with," "by (means of)" 3. "in," "on" (with preps.)
Accusative	1. direct object 2. "toward," "(in)to," "against" (with preps.)
Vocative	direct address

PARSING

To parse a Greek noun means to identify the three qualities – gender, number, and case – of any given noun form. For example, a specific noun form could be: Masculine,Singular,Nominative

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Once you know these three qualities and the noun's meaning, you have the tools to understand how to translate a noun in a given sentence.

Building a Greek Noun

I. Masculine Nouns

Now that you have learned what information a Greek noun conveys, let's see how Greek inflects its nouns to convey this information. We begin with the NOUN STEM. The stem tells you the person, place or thing to which the noun refers. For example:

- παιδ *child*
- δαιμον *divinity, spirit*
- ἀρχοντ *ruler*

To indicate the number and case of a noun, Greek adds CASE ENDINGS to the stems. Since Greek nouns most commonly use two numbers (Singular, Plural) and four cases (Nominative, Genitive, Dative, Accusative), Greek nouns need eight different endings to cover all the possibilities.

The first set of nouns are all MASCULINE in gender. These particular masculine nouns add the following suffixes to their stem to indicate number and case:

	Singular	Plural
Nominative	–ς	–ες
Genitive	–ος	–ων
Dative	–ι	–σι
Accusative	–α	–ας

Declining and Declensions

- The process of writing or saying all the INFLECTED forms of a noun is called DECLINING a noun.
- This is because ancient scholars metaphorically described noun forms as "declining" down from their nominative singular form.
- The other cases – Genitive, Dative, and Accusative – are sometimes referred to as OBLIQUE CASES, to distinguish them from this nominative singular form.
- Almost all Greek nouns belong to one of three INFLECTION patterns, called the FIRST DECLENSION, SECOND DECLENSION, and THIRD DECLENSION.
- Each represents a particular set of case endings for gender, number, and case.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Third-Declension Nouns

Consonant Stem Nouns

- Some nouns have stems that end with a consonant.
- Others have stems ending in a vowel.
- With third declension nouns, this distinction influences the spelling of the case endings.
- When you studied the second declension, you learned that most second declension nouns are masculine, and some are neuter.
- Most first declension nouns are feminine, but some are masculine.
- Nouns of all three genders are found in the third declension.
- This group is the most irregular group of Greek nouns. For that reason, studying the third declension may prove frustrating at first.
- Simply try to notice as many patterns as you can rather than attempting to memorize every detail of every paradigm. With time you will become more accustomed to these forms.
- Third declension nouns are characterized by various contractions (spelling changes caused by the interaction of two adjoining letters).
- We will examine these nouns in two different categories: those with stems ending in a consonant, and those with stems ending in a vowel.
- In the vocabulary list, the nominative singular form of the third declension noun is given, followed by its genitive singular ending or, in some cases, the entire genitive singular form.
- With third declension nouns, learning the genitive singular form is very important. For most third declension nouns, it is the most reliable indicator of what the dative and accusative forms will look like.
- While it is useful to learn the paradigms, the similarities in their patterns should make it possible for you to identify most third declension forms even if you cannot remember the entire paradigm for the relevant form.
- Masculine and feminine third declension nouns use the same set of endings. Neuter third declension nouns use a slightly different set.
- The basic endings for third declension nouns are as follows. A long dash (—) indicates that no case ending is used.

Case	Masculine / Feminine Endings		Neuter Endings	
	Singular	Plural	Singular	Plural
Nom.	-ς or —	-ες	—	-α
Gen.	-ος	-ων	-ος	-ων
Dat.	-ι	-σι	-ι	-σι
Acc.	-α or —	-ας	—	-α

- While these endings are strikingly different from the ones you have already learned, two of them should be very familiar.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- Notice that all genitive plural nouns, regardless of declension, end with -ων. Virtually all nominative and accusative neuter plural forms, regardless of their declension, end with -α.
- You have also already learned that all *first declension* nouns have -ας as their accusative plural ending. Masculine and feminine nouns of the *third* declension use this same ending for the accusative plural.
- Many students find it helpful to learn the most common masculine and feminine endings first using the following phrase: σόσια ἐσώνσιας.
- This phrase consists of two nonsense words created by putting the masculine / feminine endings together one after another as follows: ς-ος-ι-α ες-ων-σι-ας.
- The first "word" contains all of the singular endings, and the second contains all of the plural endings.

Finding the Stem

- To determine the spelling of the stem of a third declension noun, you must know the genitive singular form (the second form shown in the vocabulary list). Remove the genitive singular case ending (-ος), and you have the basic spelling of the noun stem.
- For example, the basic stem of the noun ἀνήρ (*man*) is ἀνδρ- (the genitive form, ἀνδρός minus its case ending, -ος).
- This is the spelling you need in order to recognize all of the other case forms of this word.
- As you learn the vocabulary for this lesson (and all future lessons), be sure to learn both the nominative and genitive singular forms for each noun.
- Masculine and feminine third declension nouns may have -ς as the nominative singular ending.
- All third declension nouns use the ending -σι for the dative plural.
- For nouns whose stems end with one of the consonants listed below, the sigma of these endings causes the same spelling changes that the sigma of the first aorist forms causes for verbs. Review those changes now:

Stem Consonant			**+ σ**	**= New Spelling**
Π	Β	Φ	+ σ	= ψ
Κ	Γ	Χ	+ σ	= ξ
τ	Δ	Θ	+ σ	= σ

Stems that end with ν lose the ν when σ is added:

Stem Consonant	**+ σ**	**= New Spelling**
Ν	+ σ	= σ

Observe the forms of the following nouns. Do not try to memorize all of these forms yet. Simply note how the endings listed above influence the spelling of the stem of each noun.

Stems Ending in Liquid Consonants

A **liquid consonant** is one where some part of the tongue is placed in contact with the roof of the mouth, and air is passed through the opening around it. Hellenistic Greek had two liquid consonants: λ and ρ.

The nouns in the two charts below (πατήρ, ἀνήρ, and σωτήρ and ἀλέκτωρ) have stems that end with a liquid consonant. All of them have separate forms for the vocative case singular (the case used for direct address). They indicate the vocative case by using the short form of the last stem vowel and shifting the accent back one syllable farther from the ending. The vocative of πατήρ is πάτερ. The vocative of ἀνήρ is ἄνερ.

The spelling of the *stem* for the dative plural forms of these nouns is unpredictable, but the dative plural *ending* is still recognizable.

A nasal consonant is one where air is passed through the nasal cavity as in the English sounds /m/ and /n/. Hellenistic Greek had two nasal consonants: μ and ν.

Most third declension nouns whose stems end in a nasal consonant follow the pattern below.

Notice that the nominative singular form does not add any ending at all. Notice also that final nasal consonants are omitted with the addition of the dative plural ending beginning with σ.

Pronouns in Greek

Definition: A pronoun is a word that stands in place of a noun usually for brevity or to avoid repetition. The person or object to which the pronoun refers is called its "antecedent." It (the ball) hit him (Elliott) in the head.

Types of Pronouns

1. Personal pronouns stand in for a person: Bill did it. He was there.
2. Demonstrative pronouns point to a person or object that is near (this/these) or far (that/those): This book belongs to that student.
3. Relative pronouns relate a subordinate clause to a noun: It is a great person who attempts to master Greek.
4. Reciprocal pronouns state an interchange between two things/persons: They loved one another.
5. Reflexive pronouns direct the action of the verb back to the subject: She hid herself behind the door.
6. Interrogative pronouns ask a question: Who broke the chair?

- Pronouns in Greek for the most part work much as they do in English: they replace nouns. Since Greek nouns are distinguished by gender, number, and case, it is logical that the pronouns that replace them inflect to represent these same qualities. You have already seen this basic mechanism in practice: the definite article is the same gender, number, and case as the noun that it modifies.

- Most Greek pronouns closely resemble the definite article.

Adjectives in Greek

- According to *Webster's Dictionary,* an adjective is:

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

a word belonging to one of the major form classes in any of numerous languages and typically serving as a modifier of a noun to denote a quality of the thing named, to indicate its quantity or extent, or to specify a thing as distinct from something else

- Adjectives are also very common in the Greek language.

Verbs in Greek

- According to *Webster's Dictionary,* an adverb is:

a word belonging to one of the major form classes in any of numerous languages, typically serving as a modifier of a verb, an adjective, another adverb, a preposition, a phrase, a clause, or a sentence, expressing some relation of manner or quality, place, time, degree, number, cause, opposition, affirmation, or denial, and in English also serving to connect and to express comment on clause content.

- A Greek **verb** describes the action or state of being in a sentence, and is primarily composed of the verb root, to which are added various affixes.
- The addition of prefixes, infixes, and/or suffixes forms each particular *stem* and *personal ending.*
- The verb stem expresses the basic meaning of the verb and indicates tense and mood.
- The personal endings convey voice, person and number in agreement with its subject.
- The inflection of a verb is called its *conjugation*, and verbs are said to be conjugated.
- *Tense* expresses *aspect* or the kind of action, either continuous, undefined, or the completion of an action; tense expresses both *aspect* and *time* (present, past, future) in the indicative mood.

- The Greek verb has seven tenses in the indicative mood: present, future, aorist (see below), perfect, imperfect, pluperfect, and future perfect.

- *Voice* is active, middle, or passive.

1. In the *active* voice, the person performs the action, as "the teacher taught the students."
2. In the *passive* voice, the subject is acted upon, as "the students were taught by the teacher."
3. There is also *middle* voice, in which the subject of the verb does the action, but the action somehow affects the subject, as in self-interest, such as "I defend myself."

Mood

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- There are four moods in **Greek**: the indicative mood, the subjunctive mood, the optative mood, and the imperative mood. Additionally, verbal nouns (infinitives) and verbal adjectives (participles), while not moods in the proper sense, are often classified under the heading of mood for the sake of convenience.

- The *mood* of a verb may be
    1. *indicative* (the most common), a statement of fact, reality, or actual occurrence;
    2. *imperative*, a command;
    3. *subjunctive*, a contemplated, possible, or probable action; or
    4. *optative*, a wish or hope.

- There are three principal parts to an English verb:
    1. the present tense,
    2. the simple past, and
    3. the past participle.
        - Examples are "bless, blessed, blessed," or "sing, sang, sung."

The Greek language has <u>six</u> principal parts or tense forms to a verb.

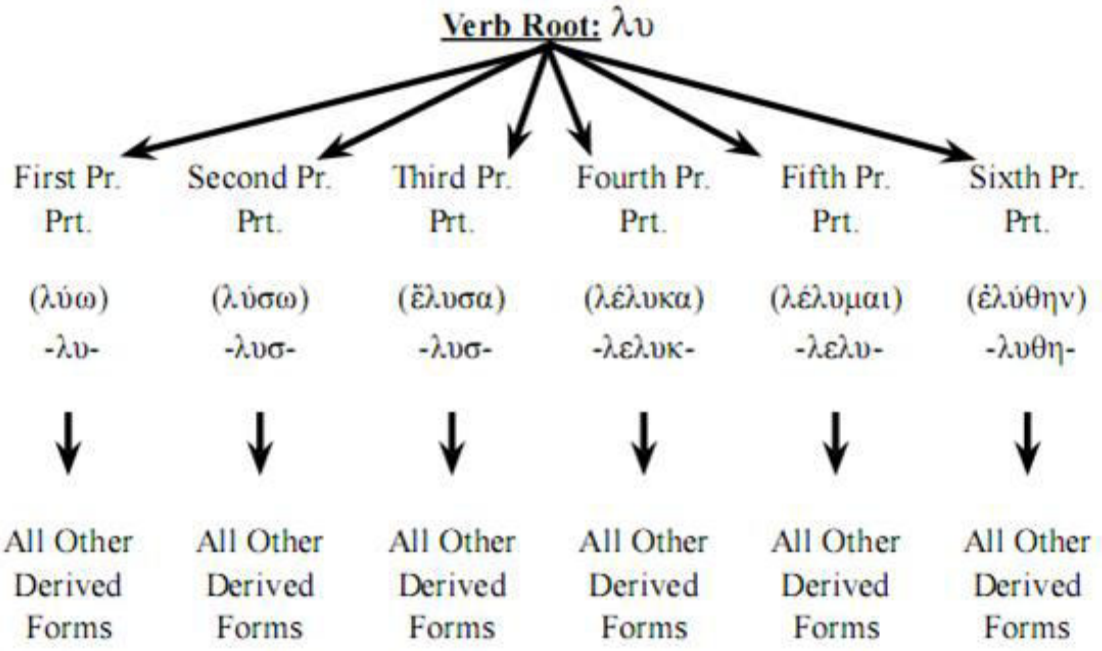

The principal parts of a verb are a standard set of related forms from which you can provide the correct stem for each particular verb to express tense, voice, mood, person, and number.

All possible forms of a Greek verb, including infinitives and participles, are inflected from a stem derived from one of these six principal parts.

Here are the six principal parts of the verb **λύω**, a regular verb which means "I loose, untie, free, release," or (2) "I destroy," and in which the verb root *λυ* is consistent throughout:

Principal Part:	Present Active	Future Active	Aorist Active	Perfect Active	Perfect Middle/Passive	Aorist Passive
Verb:	Λύω	Λύσω	ἔλυσα	Λέλυκα	Λέλυμαι	ἐλύθην
Translation:	I loose	I will loose	I loosed	I have loosed	I have been loosed	I was loosed

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

This overview of verb construction will carry us far. As we continue learning new verb Tenses and Moods, we will see that they are formed by ***attaching*** a variety of ***accessories*** (augments, suffixes, connecting vowels, personal endings, declensional endings) onto the ***naked Principal Parts***.

To conjugate a verb,

For example, take the first principal part of the verb *I have* - **ἔχω**, which serves as the lexical or dictionary form of the verb.

The present tense stem is formed by removing **the omega**, and in combination with the connecting or thematic vowel and the primary active personal endings, one is given the

following conjugation of the present active indicative of the verb ἔχω:

PARSING THE VERB

You have learned the Greek alphabet and other components of the Greek writing system. Let us turn now to Greek words: what they mean, how to form them, and how to understand them. We begin with perhaps the most essential word in a Greek sentence: the VERB. A verb describes an action. These actions most often are physical (*to kick*), mental (*to think*), or express states or conditions (*to be*).

An English verb form, on its own, often expresses only the action that is taking place, e.g. *run*, *stop*, *exist*. Greek, however, is a highly INFLECTED language. In other words, Greek INFLECTS, or changes, its verbs, nouns, pronouns, and adjectives to represent exactly how each of these words functions grammatically in a sentence. For a Greek verb, these inflections usually communicate FIVE pieces of information: PERSON, NUMBER, TENSE, MOOD, and VOICE.

1. PERSON indicates the subject of the verb.

- 1st person = I, we
- 2nd person = you, you all
- 3rd person = he/she/it, they, or anyone/anything else

2. NUMBER indicates whether the subject (“person”) is singular or plural.

- Singular: I, you, he/she/it, or any single subject
- Plural: we, you all, they, or any plural subject

The Greek SINGULAR and PLURAL operate much as they do in English. Greek, however, also has a DUAL number, which indicates that there are precisely two subjects. This number is rarely used by most authors, however. Here we concentrate on the much more common singular and plural. The dual number will be discussed as it is encountered in your readings.

3. TENSE indicates when the action happens.

English uses a combination of verb changes and/or additional words to indicate six main tenses:

- Present: *run, stop*
- Past: *ran, stopped*
- Future: *will run, will stop*
- Present Perfect: *have (just) run, have (just) stopped*
- Past Perfect (or Pluperfect): *had run, had stopped*
- Future Perfect: *will have run, will have stopped*

As we will see, Greek tenses are similar, with a few important differences.

4. MOOD refers to the "mode" of the verb.

Most often, the mood of the verb indicates whether the action is real or hypothetical in some way. English uses a combination of verb changes and/or additional words to indicate four moods.

- The INDICATIVE mood is most common, and expresses facts:
  - *she runs, he stops*
- The IMPERATIVE mood gives commands:
  - *run! stop!*
- The SUBJUNCTIVE mood expresses unreal or hypothetical actions, such as wishes, conditions, and possibilities:
  - *she might run, if he could stop…*

- The INFINITIVE mood refers to action without a person or number. In practice, it functions much like a verbal noun. It is formed in English by adding the word *to* to the verb form:
  - *to run, to stop*

Greek moods are similar, though again with some important differences.

5. VOICE indicates the relationship between the action of the verb and its subject.

English uses a combination of verb changes and/or additional words to indicate two possible voices.

- The ACTIVE voice indicates that the subject of the verb is carrying out the action:
  - *She* (subject) *stopped the car.*
  - *All* (subject) *love music.*
- The PASSIVE voice indicates that the subject receives the consequences of the action:
  - *The car* (subject) *was stopped by her.*
  - *Music* (subject) *is loved by all.*

The Greek ACTIVE and PASSIVE voices operate much as they do in English. Greek also has a MIDDLE voice, which often indicates that the subject is both the agent and recipient of the action.

II. Parsing the Greek verb

To PARSE a Greek verb means to identify these five qualities – Person, Number, Tense, Mood, Voice – for any given verb form. For example, a specific verb form could be:Third person, Singular, Present, Indicative, Active.Once you know these five items and the verb's meaning, you have identified the verb completely and understand what it means.

- A good place to start when translating a Greek sentence is the verb.
- In fact, a Greek verb by itself can be an entire sentence (e.g., πάρειμι. I am present).
- Recall that a Greek verb on its own expresses five pieces of information:

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

- Person
- Number
- Tense
- Mood
- Voice

Parsing Options

Tense	Voice	Mood	Person	Number
Present	**Active**	**Indicative**	**1st**	**Singular**
Imperfect	Middle	Subjunctive	**2nd**	**Plural**
Future	Passive	Optative	**3rd**	
Aorist		Imperative		
Perfect				
Pluperfect				
Future Perfect				

To PARSE a Greek verb means to identify these five qualities about a specific verb form. The verb in our sentence, δίδωσι, is:

- 3rd person
- Singular
- Present
- Indicative
- Active

REMEMBER: The form of the verb determines its *meaning*, not its place in the sentence. It can appear anywhere in the sentence with no change in meaning:

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

Example

- **δίδωσιν ὁ Μάρκος τοῖς ἄρχουσι τὸν παῖδα τοῦ Πείσονος.**
- **ὁ Μάρκος δίδωσι τοῖς ἄρχουσι τὸν παῖδα τοῦ Πείσονος.**
- **ὁ Μάρκος τοῖς ἄρχουσι δίδωσι τὸν παῖδα τοῦ Πείσονος.**
- **ὁ Μάρκος τοῖς ἄρχουσι τὸν παῖδα δίδωσι τοῦ Πείσονος.**
- **ὁ Μάρκος τοῖς ἄρχουσι τὸν παῖδα τοῦ Πείσονος δίδωσιν.**

Translation

- *Marcus gives the rulers the child of Piso.*
- *Marcus gives the rulers Piso's child.*
- *Marcus gives Piso's child to the rulers.*
- *Marcus is giving Piso's child to the rulers***.**

Building a Greek Verb

I. The Present Indicative Active

- Now that you have learned the types of information that a Greek verb form conveys about an action, let us turn to how a Greek verb is inflected to convey this information.

English verbs often make additions or use additional words to convey Person, Number, Tense, Mood, and Voice.

These imaginary English verbs work basically the way verbs work in Greek. Greek verbs for the most part communicate person, number, tense, mood, and voice by adding parts to the verb, rather than by using additional words. Building verbs this way can seem strange at first, but to a Greek, the number of words English needs to express what Greek can do in one word would seem equally strange.

To begin building a Greek verb, start with the VERB STEM (S 191). The stem is the part of the word that tells you what action the verb describes:

- δεικ– = *show*

All the verbs in this lesson are in the PRESENT TENSE. Sometimes in Greek, a marker is added to the stem that says the verb is in the present tense. In the case of the verb stem δεικ-, adding a –ν– to the verb stem marks a verb as in the present tense. It will be easier to pronounce this verb by adding an *upsilon*: –νυ–.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

So now we have a TENSE STEM, specifically a PRESENT TENSE STEM, that looks and sounds like this:

- δεικνυ– = *show*

The most common mood of Greek verbs is the INDICATIVE, indicating that the action of the verb is real. All the verbs in this lesson are in the ACTIVE voice, so the following verb forms are:

- Present tense
- Indicative mood
- Active voice

To indicate person and number, the verb needs to add PERSONAL ENDINGS, which are as follows:

–μι = *I* (1st person singular) –μεν = *we* (1st person plural)

–ς = *you* (2nd person singular) –τε = *y'all* (2nd person plural)

–σι(ν) = *(s)he, it* (3rd person sg) –ασι(ν) = *they* (3rd person pl)

Note: (ν) indicates that this ending has a MOVABLE NU.

Putting it all together, the Present Indicative Active of δείκνυμι is as follows :

δείκνυμι *I show* δείκνυμεν *we show*

δείκνυς *you show* δείκνυτε *you all show*

δείκνυσι *(s)he, it shows* δεικνύασι *they show*

Notice that since the very form of δείκνυμι informs us that the person and number is first person singular, Greek does not need the personal pronoun ἐγώ, "I." In general, if Greek does use the personal pronoun, it is for stress: ἐγὼ δείκνυμι *"I myself* show." The same principle applies to verbs with second person endings. The subject of third person verb forms is usually clear from the context of the sentence.

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

II. The Infinitive Mood

The INFINITIVE is another common mood of Greek verbs. The infinitive refers to the action without person or number. As a result, it needs only a single ending to mark tense and voice. The ending –ναι forms the Present Active Infinitive for the verbs in this lesson. The accent falls on the PENULT.

- δεικνύναι *to show*

We learn the various meanings and uses of the Greek infinitive mood in the coming chapters.

III. Conjugating

To CONJUGATE a verb means to provide all six INFLECTED forms of a particular verb in a particular tense, mood, and voice. So, the above chart is a conjugation of δείκνυμι, in the Present, Indicative, Active.

Contract Verbs

- The rules of vowel contraction operate in verbs when the VERB STEM ends in one of three short vowels: –α, –ε or –ο.
- In these cases, the final vowel of the stem contracts with the THEMATIC VOWEL of –ω verbs.
- Verbs that exhibit these contractions are called CONTRACT VERBS.
- Since –μι verbs do not conjugate with a thematic vowel, they do not contract.
- There are three types of contract verbs: έω, άω, and όω.
- To inform readers that a verb is a CONTRACT VERB, its FIRST PRINCIPAL PART is always listed in its uncontracted form in a lexicon. For example:

1. αἱρέω *grab*
2. ἐρωτάω *ask*
3. δηλόω *show*

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω

Participles in Greek

Introduction

In Greek, participles are used in much the same way as they are in English. Present participles are formed in English by adding "-ing" to the verbal form (e.g., walking). A participle is a verbal adjective.

The participle is a critical part of the Greek language. Care must be taken to recognize its forms. One must also know the diverse ways it is translated, whether as an adjective or as an adverb.

Adverbs in Greek

I. **Adverbs work the same way in Greek as they do in the English language.**

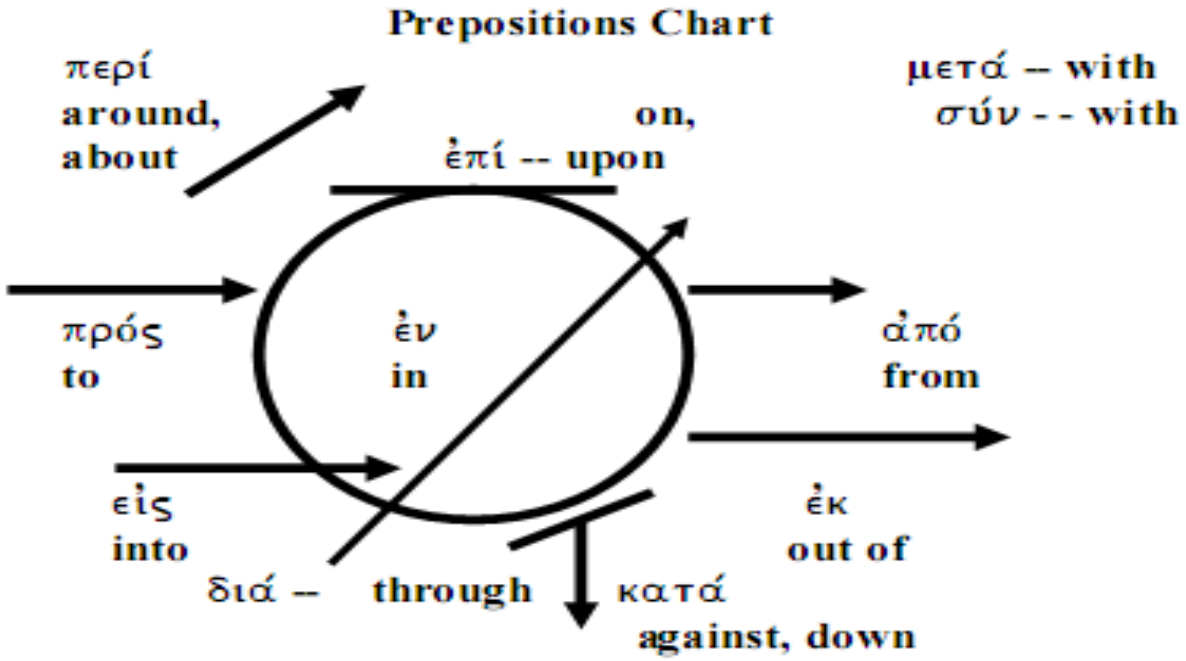

ii. Adverbs are formed from adjectives by adding ως to the stem of the positive, using the neuter accusative singular for the comparative, and the neuter accusative plural for the superlative; e.g., καλῶς, κάλλιον, κάλλιστα.

Prepositions

While adverbs qualify the action, motion, or state of verbs as to manner, place, time, and extent, prepositions do also; but, in addition to this, they mark the direction and relative position of the action, motion, or state expressed by the verb. Prepositions then attend upon verbs to help them express more specifically their relation to substantives. Thus in *ἠκούσατε ἀπ' ἀρχῆς*, *you heard from the beginning*, the hearing is qualified by being localized in time; in *ἦλθεν εἰς τὸ ἱερόν*, *he went into the temple*, the going is limited as to place. It is incorrect in view of the above to say that prepositions govern cases. Neither is the opposite true, that cases govern prepositions. But it is true that as cases limit and define the relations of verbs to substantives, so also prepositions help to express

more exactly and effectively the very distinctions for which cases were created. They are also used to express the case relations of substantive with substantive, as Eph. 6:23, *ἀγάπη μετὰ πίστεως ἀπὸ θεοῦ*, *love with faith from God*. Thus from being purely an adjunct of the verb in function, prepositions were transferred to more intimate association with the noun, to define more closely its relation to the rest of the sentence. Some came to have case endings according to the case with which they were first used. Thus to understand the full significance of a preposition one needs to know the function of the case with which it is used in each instance, the meaning of the preposition absolutely, and, what is most difficult, learn what it means relatively in each context.

Conjunctions

Conjunctions in Greek work much as they do in English. Greek, however, uses them far more often, and frequently in more subtle ways, than formal written English does.

This is in part because Greek has a strong tendency to link clauses and sentences together. While consecutive sentences in English are most often separated by a pause (period), many consecutive sentences in Greek are instead marked or offset by coordinating conjunctions, such as *and*, *but*, and *therefore* .

In Greek, some conjunctions always follow the word that they link. Such conjunctions are called **POSTPOSITIVE.**

- All the *and* words in Greek are postpositive except for καί.
- As a result of the frequency of postpositive conjunctions, it is often the case that the second word – or third, if it follows a noun with a definite article – in a clause or sentence is a conjunction.
- A postpositive conjunction can never be the first word in a sentence.

Particles in Greek

α	β	γ	δ	ε	ζ	η	θ	ι	κ	λ	μ	ν	ξ	ο	π	ρ	σς	τ	υ	φ	χ	ψ	ω
Α	Β	Γ	Δ	Ε	Ζ	Η	Θ	Ι	Κ	Λ	Μ	Ν	Ξ	Ο	Π	Ρ	Σ	Τ	Υ	Φ	Χ	Ψ	Ω

The term *particle* has undefined limits among Greek grammarians. To some it includes nearly all parts of speech except verbs, nouns, and pronouns; namely, adverbs, conjunctions, prepositions, and interjections. The word *particle* is derived from a Latin word which means a *small part*. It is a suitable word to head a classification which deals with the "odds and ends" in Greek grammar. We have chosen to limit it chiefly to those words which do not properly belong to the regular classifications, such as conjunctions, adverbs, prepositions, etc. The abundant and diversified uses of particles by the Greeks is one of the most unique and distinctive characteristics of their unparalleled language. However, in contrast with classical Greek we find comparatively few particles in the papyri and the New Testament.

The Negatives

The Negatives

οὐ is the negative of the indicative, μή is the negative of the other moods, including the infinitive and the participle.

Example: *ὁ μὴ πιστεύων οὐ σώζεται, the not-believing one is not saved*, or *he who does not believe is not saved*. Here *μή* negatives the participle *πιστεύων*, and *οὐ* negatives the indicative *σώζεται*.

Sentences in Greek

Order of Words

The normal order of the sentence in Greek is like that in English—subject, verb, object. There is no special tendency, as in Latin, to put the verb at the end. But Greek can vary the order for purposes of emphasis or euphony much more freely than English. Thus the sentence, *an apostle says a word*, is in Greek normally *ἀπόστολος λέγει λόγον*. But *λέγει ἀπόστολος λόγον* and *λόγον λέγει ἀπόστολος* are both perfectly possible. The English translation must be determined by observing the *endings*, not by observing the order.

Sentence Parts (Συνταχ)

The sentence is divided into two parts:

1. Subject, about which something is said.
   - Simple subject: Terry went to the store. / The big red truck moved slowly.
   - Complete subject: The big red truck moved slowly.
   - Compound subject: Terry and Dawn went to the store.
   - Understood subject: Please close the door ("you" is understood).

2. Predicate is that which is said about the subject.
   - Simple predicate: Joy walked home.
   - Complete predicate: Joy walked home.
   - Compound predicate: Joy walked home and raked leaves.

Predicate nominative: It is I (rather than "It is me"). A predicate nominative completes the idea of the subject. It will most often occur with an "is" verb.

- I assume that users of New Testament Greek may want to memorize selected passages.

  Accordingly, in each lesson a student should try to read one memory verse.

- Of all such passages,
  1. the Lord's Prayer,
  2. Saint Mary's prophecy
  3. Saint Mary's and Saint Gabriel's words
  4. The Genealogy of Jesus Christ
  5. The Creed may be the most highly preferred.

     I chose these because these passages are easily recited on the New Testament during our daily prayer.

I provided it here both as samples of New Testament Greek and for memorization.

Our Lord's Prayer Matthew 6:8-13 (አቡነ ዘበሰማያት)

- Οὕτως οὖν προσεύχεσθε ὑμεῖς:
- Πάτερ ἡμῶν ὁ ἐν τοῖς οὐρανοῖς,

ἀπεστάλη ὁ ἄγγελος Γαβριὴλ ἀπὸ τοῦ θεοῦ
εἰς πόλιν τῆς Γαλιλαίας ᾗ ὄνομα Ναζαρὲθ
[27]πρὸς παρθένον ἐμνηστευμένην ἀνδρὶ ᾧ ὄνομα Ἰωσὴφ ἐξ οἴκου Δαυίδ,
καὶ τὸ ὄνομα τῆς παρθένου Μαριάμ.
[28]καὶ εἰσελθὼν πρὸς αὐτὴν εἶπεν,
Χαῖρε, κεχαριτωμένη,
ὁ κύριος μετὰ σοῦ.
[29]ἡ δὲ ἐπὶ τῷ λόγῳ διεταράχθη
καὶ διελογίζετο ποταπὸς εἴη ὁ ἀσπασμὸς οὗτος.
[30]καὶ εἶπεν ὁ ἄγγελος αὐτῇ, Μὴ φοβοῦ, Μαριάμ,
εὗρες γὰρ χάριν παρὰ τῷ θεῷ:
[31]καὶ ἰδοὺ συλλήμψῃ ἐν γαστρὶ καὶ τέξῃ υἱόν,

37 καὶ ἤκουσαν οἱ δύο μαθηταὶ αὐτοῦ ᾽ λαλοῦντος καὶ ἠκολούθησαν τῷ Ἰησοῦ.
38 στραφεὶς δὲ ὁ Ἰησοῦς καὶ θεασάμενος αὐτοὺς ἀκολουθοῦντας λέγει αὐτοῖς · Τί ζητεῖτε; οἱ δὲ εἶπαν αὐτῷ · Ῥαββί ὃ λέγεται μεθερμηνευόμενον Διδάσκαλε), ποῦ μένεις;
39 λέγει αὐτοῖς · Ἔρχεσθε καὶ ὄψεσθε. ἦλθαν οὖν ᾽ καὶ εἶδαν ποῦ μένει, καὶ παρ᾽ αὐτῷ ἔμειναν τὴν ἡμέραν ἐκείνην · ὥρα ἦν ὡς δεκάτη.

40 ἦν Ἀνδρέας ὁ ἀδελφὸς Σίμωνος Πέτρου εἷς ἐκ τῶν δύο τῶν ἀκουσάντων παρὰ Ἰωάννου καὶ ἀκολουθησάντων αὐτῷ ·
41 εὑρίσκει οὗτος πρῶτον τὸν ἀδελφὸν τὸν ἴδιον Σίμωνα καὶ λέγει αὐτῷ · Εὑρήκαμεν τὸν Μεσσίαν ὅ ἐστιν μεθερμηνευόμενον χριστός).
42 ἤγαγεν αὐτὸν πρὸς τὸν Ἰησοῦν. ἐμβλέψας αὐτῷ ὁ Ἰησοῦς εἶπεν · Σὺ εἶ Σίμων ὁ υἱὸς Ἰωάννου, σὺ κληθήσῃ Κηφᾶς ὃ ἑρμηνεύεται Πέτρος).
43 Τῇ ἐπαύριον ἠθέλησεν ἐξελθεῖν εἰς τὴν Γαλιλαίαν. καὶ εὑρίσκει Φίλιππον καὶ λέγει αὐτῷ ὁ Ἰησοῦς · Ἀκολούθει μοι.
44 ἦν δὲ ὁ Φίλιππος ἀπὸ Βηθσαϊδά, ἐκ τῆς πόλεως Ἀνδρέου καὶ Πέτρου.
45 εὑρίσκει Φίλιππος τὸν Ναθαναὴλ καὶ λέγει αὐτῷ · Ὃν ἔγραψεν Μωϋσῆς ἐν τῷ νόμῳ καὶ οἱ προφῆται εὑρήκαμεν, Ἰησοῦν υἱὸν τοῦ Ἰωσὴφ τὸν ἀπὸ Ναζαρέτ.
46 καὶ εἶπεν αὐτῷ Ναθαναήλ · Ἐκ Ναζαρὲτ δύναταί τι ἀγαθὸν εἶναι; λέγει αὐτῷ ὁ Φίλιππος · Ἔρχου καὶ ἴδε.
47 εἶδεν ὁ Ἰησοῦς τὸν Ναθαναὴλ ἐρχόμενον πρὸς αὐτὸν καὶ λέγει περὶ αὐτοῦ · Ἴδε ἀληθῶς Ἰσραηλίτης ἐν ᾧ δόλος οὐκ ἔστιν.
48 λέγει αὐτῷ Ναθαναήλ · Πόθεν με γινώσκεις; ἀπεκρίθη Ἰησοῦς καὶ εἶπεν αὐτῷ · Πρὸ τοῦ σε Φίλιππον φωνῆσαι ὄντα ὑπὸ τὴν συκῆν εἶδόν σε.
49 ἀπεκρίθη αὐτῷ Ναθαναήλ ᾽· Ῥαββί, σὺ εἶ ὁ υἱὸς τοῦ θεοῦ, σὺ βασιλεὺς εἶ ᾽ τοῦ Ἰσραήλ.
50 ἀπεκρίθη Ἰησοῦς καὶ εἶπεν αὐτῷ · Ὅτι εἶπόν σοι ὅτι εἶδόν σε ὑποκάτω τῆς συκῆς πιστεύεις; μείζω τούτων ὄψῃ.
51 καὶ λέγει αὐτῷ · Ἀμὴν ἀμὴν λέγω ὑμῖν, ὄψεσθε τὸν οὐρανὸν ἀνεῳγότα καὶ τοὺς ἀγγέλους τοῦ θεοῦ ἀναβαίνοντας καὶ καταβαίνοντας ἐπὶ τὸν υἱὸν τοῦ ἀνθρώπου.

Romans 1 (እምጳውሎስ ገብሩ ለኢየሱስ ክርስቶስ)

1 Παῦλος δοῦλος Χριστοῦ Ἰησοῦ, κλητὸς ἀπόστολος, ἀφωρισμένος εἰς εὐαγγέλιον θεοῦ
2 ὃ προεπηγγείλατο διὰ τῶν προφητῶν αὐτοῦ ἐν γραφαῖς ἁγίαις
3 περὶ τοῦ υἱοῦ αὐτοῦ, τοῦ γενομένου ἐκ σπέρματος Δαυὶδ κατὰ σάρκα,
4 τοῦ ὁρισθέντος υἱοῦ θεοῦ ἐν δυνάμει κατὰ πνεῦμα ἁγιωσύνης ἐξ ἀναστάσεως νεκρῶν, Ἰησοῦ Χριστοῦ τοῦ κυρίου ἡμῶν,
5 δι’ οὗ ἐλάβομεν χάριν καὶ ἀποστολὴν εἰς ὑπακοὴν πίστεως ἐν πᾶσιν τοῖς ἔθνεσιν ὑπὲρ τοῦ ὀνόματος αὐτοῦ,
6 ἐν οἷς ἐστε καὶ ὑμεῖς κλητοὶ Ἰησοῦ Χριστοῦ,
7 πᾶσιν τοῖς οὖσιν ἐν Ῥώμῃ ἀγαπητοῖς θεοῦ, κλητοῖς ἁγίοις · χάρις ὑμῖν καὶ εἰρήνη ἀπὸ θεοῦ πατρὸς ἡμῶν καὶ κυρίου Ἰησοῦ Χριστοῦ.
8 Πρῶτον μὲν εὐχαριστῶ τῷ θεῷ μου διὰ Ἰησοῦ Χριστοῦ περὶ πάντων ὑμῶν, ὅτι ἡ πίστις ὑμῶν καταγγέλλεται ἐν ὅλῳ τῷ κόσμῳ.
9 μάρτυς γάρ μού ἐστιν ὁ θεός, ᾧ λατρεύω ἐν τῷ πνεύματί μου ἐν τῷ εὐαγγελίῳ τοῦ υἱοῦ αὐτοῦ, ὡς ἀδιαλείπτως μνείαν ὑμῶν ποιοῦμαι
10 πάντοτε ἐπὶ τῶν προσευχῶν μου, δεόμενος εἴ πως ἤδη ποτὲ εὐοδωθήσομαι ἐν τῷ θελήματι τοῦ θεοῦ ἐλθεῖν πρὸς ὑμᾶς.
11 ἐπιποθῶ γὰρ ἰδεῖν ὑμᾶς, ἵνα τι μεταδῶ χάρισμα ὑμῖν πνευματικὸν εἰς τὸ στηριχθῆναι ὑμᾶς,
12 τοῦτο δέ ἐστιν συμπαρακληθῆναι ἐν ὑμῖν διὰ τῆς ἐν ἀλλήλοις πίστεως ὑμῶν τε καὶ ἐμοῦ.
13 οὐ θέλω δὲ ὑμᾶς ἀγνοεῖν, ἀδελφοί, ὅτι πολλάκις προεθέμην ἐλθεῖν πρὸς ὑμᾶς, καὶ ἐκωλύθην ἄχρι τοῦ δεῦρο, ἵνα τινὰ καρπὸν σχῶ καὶ ἐν ὑμῖν καθὼς καὶ ἐν τοῖς λοιποῖς ἔθνεσιν.

14 Ἕλλησίν τε καὶ βαρβάροις, σοφοῖς τε καὶ ἀνοήτοις ὀφειλέτης εἰμί ·
15 οὕτως τὸ κατ᾽ ἐμὲ πρόθυμον καὶ ὑμῖν τοῖς ἐν Ῥώμῃ εὐαγγελίσασθαι.
16 Οὐ γὰρ ἐπαισχύνομαι τὸ εὐαγγέλιον, δύναμις γὰρ θεοῦ ἐστιν εἰς σωτηρίαν παντὶ τῷ πιστεύοντι, Ἰουδαίῳ τε πρῶτον καὶ Ἕλληνι ·
17 δικαιοσύνη γὰρ θεοῦ ἐν αὐτῷ ἀποκαλύπτεται ἐκ πίστεως εἰς πίστιν, καθὼς γέγραπται · Ὁ δὲ δίκαιος ἐκ πίστεως ζήσεται.
18 Ἀποκαλύπτεται γὰρ ὀργὴ θεοῦ ἀπ᾽ οὐρανοῦ ἐπὶ πᾶσαν ἀσέβειαν καὶ ἀδικίαν ἀνθρώπων τῶν τὴν ἀλήθειαν ἐν ἀδικίᾳ κατεχόντων,
19 διότι τὸ γνωστὸν τοῦ θεοῦ φανερόν ἐστιν ἐν αὐτοῖς, ὁ θεὸς γὰρ ᾽ αὐτοῖς ἐφανέρωσεν.
20 τὰ γὰρ ἀόρατα αὐτοῦ ἀπὸ κτίσεως κόσμου τοῖς ποιήμασιν νοούμενα καθορᾶται, ἥ τε ἀΐδιος αὐτοῦ δύναμις καὶ θειότης, εἰς τὸ εἶναι αὐτοὺς ἀναπολογήτους,
21 διότι γνόντες τὸν θεὸν οὐχ ὡς θεὸν ἐδόξασαν ἢ ηὐχαρίστησαν, ἀλλὰ ἐματαιώθησαν ἐν τοῖς διαλογισμοῖς αὐτῶν καὶ ἐσκοτίσθη ἡ ἀσύνετος αὐτῶν καρδία ·
22 φάσκοντες εἶναι σοφοὶ ἐμωράνθησαν,
23 καὶ ἤλλαξαν τὴν δόξαν τοῦ ἀφθάρτου θεοῦ ἐν ὁμοιώματι εἰκόνος φθαρτοῦ ἀνθρώπου καὶ πετεινῶν καὶ τετραπόδων καὶ ἑρπετῶν.
24 Διὸ παρέδωκεν αὐτοὺς ὁ θεὸς ἐν ταῖς ἐπιθυμίαις τῶν καρδιῶν αὐτῶν εἰς ἀκαθαρσίαν τοῦ ἀτιμάζεσθαι τὰ σώματα αὐτῶν ἐν αὐτοῖς,
25 οἵτινες μετήλλαξαν τὴν ἀλήθειαν τοῦ θεοῦ ἐν τῷ ψεύδει, καὶ ἐσεβάσθησαν καὶ ἐλάτρευσαν τῇ κτίσει παρὰ τὸν κτίσαντα, ὅς ἐστιν εὐλογητὸς εἰς τοὺς αἰῶνας · ἀμήν.
26 Διὰ τοῦτο παρέδωκεν αὐτοὺς ὁ θεὸς εἰς πάθη ἀτιμίας · αἵ τε γὰρ θήλειαι αὐτῶν μετήλλαξαν τὴν φυσικὴν χρῆσιν εἰς τὴν παρὰ φύσιν,
27 ὁμοίως τε καὶ οἱ ἄρσενες ἀφέντες τὴν φυσικὴν χρῆσιν τῆς θηλείας ἐξεκαύθησαν ἐν τῇ ὀρέξει αὐτῶν εἰς ἀλλήλους, ἄρσενες ἐν ἄρσεσιν τὴν ἀσχημοσύνην κατεργαζόμενοι καὶ τὴν ἀντιμισθίαν ἣν ἔδει τῆς πλάνης αὐτῶν ἐν ἑαυτοῖς ἀπολαμβάνοντες.
28 Καὶ καθὼς οὐκ ἐδοκίμασαν τὸν θεὸν ἔχειν ἐν ἐπιγνώσει, παρέδωκεν αὐτοὺς ὁ θεὸς εἰς ἀδόκιμον νοῦν, ποιεῖν τὰ μὴ καθήκοντα,
29 πεπληρωμένους πάσῃ ἀδικίᾳ πονηρίᾳ πλεονεξίᾳ κακίᾳ, μεστοὺς φθόνου φόνου ἔριδος δόλου κακοηθείας, ψιθυριστάς,
30 καταλάλους, θεοστυγεῖς, ὑβριστάς, ὑπερηφάνους, ἀλαζόνας, ἐφευρετὰς κακῶν, γονεῦσιν ἀπειθεῖς,
31 ἀσυνέτους, ἀσυνθέτους, ἀστόργους, ἀνελεήμονας ·
32 οἵτινες τὸ δικαίωμα τοῦ θεοῦ ἐπιγνόντες, ὅτι οἱ τὰ τοιαῦτα πράσσοντες ἄξιοι θανάτου εἰσίν, οὐ μόνον αὐτὰ ποιοῦσιν ἀλλὰ καὶ συνευδοκοῦσιν τοῖς πράσσουσιν.

ΚΕΦΑΛΑΙΟ 1

1. **ΕΝ ἀρχῇ ἐποίησεν ὁ Θεὸς τὸν οὐρανὸν καὶ τὴν γῆν. በቀዳሚ ገብረ እግዚአብሔር ሰማየ ወምድረ።**
2. **ἡ δὲ γῆ ἦν ἀόρατος καὶ ἀκατασκεύαστος, καὶ σκότος ἐπάνω τῆς ἀβύσσου, καὶ πνεῦμα Θεοῦ ἐπεφέρετο ἐπάνω τοῦ ὕδατος.**
3. **καὶ εἶπεν ὁ Θεός· γενηθήτω φῶς· καὶ ἐγένετο φῶς.**
4. **καὶ εἶδεν ὁ Θεὸς τὸ φῶς, ὅτι καλόν· καὶ διεχώρισεν ὁ Θεὸς τὸ φῶς, ὅτι καλόν· καὶ διεχώρισεν ὁ Θεὸς ἀνὰ μέσον τοῦ φωτὸς καὶ ἀνὰ μέσον τοῦ σκότους.**
5. **καὶ ἐκάλεσεν ὁ Θεὸς τὸ φῶς ἡμέραν καὶ τὸ σκότος ἐκάλεσε νύκτα. καὶ ἐγένετο ἑσπέρα καὶ ἐγένετο πρωΐ, ἡμέρα μία.**
6. **Καὶ εἶπεν ὁ Θεός· γενηθήτω στερέωμα ἐν μέσῳ τοῦ ὕδατος καὶ ἔστω διαχωρίζον ἀνὰ μέσον ὕδατος καὶ ὕδατος. καὶ ἐγένετο οὕτως.**

7 καὶ ἐποίησεν ὁ Θεὸς τὸ στερέωμα, καὶ διεχώρισεν ὁ Θεὸς ἀνὰ μέσον τοῦ ὕδατος, ὃ ἦν ὑποκάτω τοῦ στερεώματος, καὶ ἀναμέσον τοῦ ὕδατος τοῦ ἐπάνω τοῦ στερεώματος.

8 καὶ ἐκάλεσεν ὁ Θεὸς τὸ στερέωμα οὐρανόν. καὶ εἶδεν ὁ Θεός, ὅτι καλόν, καὶ ἐγένετο ἑσπέρα καὶ ἐγένετο πρωΐ, ἡμέρα δευτέρα.

9 Καὶ εἶπεν ὁ Θεός· συναχθήτω τὸ ὕδωρ τὸ ὑποκάτω τοῦ οὐρανοῦ εἰς συναγωγὴν μίαν, καὶ ὀφθήτω ἡ ξηρά. καὶ ἐγένετο οὕτως. καὶ συνήχθη τὸ ὕδωρ τὸ ὑποκάτω τοῦ οὐρανοῦ εἰς τὰς συναγωγὰς αὐτῶν, καὶ ὤφθη ἡ ξηρά.

10 καὶ ἐκάλεσεν ὁ Θεὸς τὴν ξηρὰν γῆν καὶ τὰ συστήματα τῶν ὑδάτων ἐκάλεσε θαλάσσας. καὶ εἶδεν ὁ Θεός, ὅτι καλόν.

11 καὶ εἶπεν ὁ Θεός· βλαστησάτω ἡ γῆ βοτάνην χόρτου σπεῖρον σπέρμα κατὰ γένος καὶ καθ’ ὁμοιότητα, καὶ ξύλον κάρπιμον ποιοῦν καρπόν, οὗ τὸ σπέρμα αὐτοῦ ἐν αὐτῷ κατὰ γένος ἐπὶ τῆς γῆς. καὶ ἐγένετο οὕτως.

12 καὶ ἐξήνεγκεν ἡ γῆ βοτάνην χόρτου σπεῖρον σπέρμα κατὰ γένος καὶ καθ’ ὁμοιότητα, καὶ ξύλον κάρπιμον ποιοῦν καρπόν, οὗ τὸ σπέρμα αὐτοῦ ἐν αὐτῷ κατὰ γένος ἐπὶ τῆς γῆς.

13 καὶ εἶδεν ὁ Θεός, ὅτι καλόν. καὶ ἐγένετο ἑσπέρα καὶ ἐγένετο πρωΐ, ἡμέρα τρίτη.

14 Καὶ εἶπεν ὁ Θεός· γενηθήτωσαν φωστῆρες ἐν τῷ στερεώματι τοῦ οὐρανοῦ εἰς φαῦσιν ἐπὶ τῆς γῆς, τοῦ διαχωρίζειν ἀνὰ μέσον τῆς ἡμέρας καὶ ἀνὰ μέσον τῆς νυκτός· καὶ ἔστωσαν εἰς σημεῖα καὶ εἰς καιροὺς καὶ εἰς ἡμέρας καὶ εἰς ἐνιαυτούς·

15 καὶ ἔστωσαν εἰς φαῦσιν ἐν τῷ στερεώματι τοῦ οὐρανοῦ, ὥστε φαίνειν ἐπὶ τῆς γῆς. καὶ ἐγένετο οὕτως.

16 καὶ ἐποίησεν ὁ Θεὸς τοὺς δύο φωστῆρας τοὺς μεγάλους, τὸν φωστῆρα τὸν μέγαν εἰς ἀρχὰς τῆς ἡμέρας καὶ τὸν φωστῆρα τὸν ἐλάσσω εἰς ἀρχὰς τῆς νυκτός, καὶ τοὺς ἀστέρας.

17 καὶ ἔθετο αὐτοὺς ὁ Θεὸς ἐν τῷ στερεώματι τοῦ οὐρανοῦ, ὥστε φαίνειν ἐπὶ τῆς γῆς

18 καὶ ἄρχειν τῆς ἡμέρας καὶ τῆς νυκτὸς καὶ διαχωρίζειν ἀνὰ μέσον τοῦ φωτὸς καὶ ἀνὰ μέσον τοῦ σκότους. καὶ εἶδεν ὁ Θεός, ὅτι καλόν.

19 καὶ ἐγένετο ἑσπέρα καὶ ἐγένετο πρωΐ, ἡμέρα τετάρτη.

20 Καὶ εἶπεν ὁ Θεός· ἐξαγαγέτω τὰ ὕδατα ἑρπετὰ ψυχῶν ζωσῶν καὶ πετεινὰ πετόμενα ἐπὶ τῆς γῆς κατὰ τὸ στερέωμα τοῦ οὐρανοῦ. καὶ ἐγένετο οὕτως.

21 καὶ ἐποίησεν ὁ Θεὸς τὰ κήτη τὰ μεγάλα καὶ πᾶσαν ψυχὴν ζῴων ἑρπετῶν, ἃ ἐξήγαγε τὰ ὕδατα κατὰ γένη αὐτῶν, καὶ πᾶν πετεινὸν πτερωτὸν κατὰ γένος. καὶ εἶδεν ὁ Θεός, ὅτι καλά.

22 καὶ εὐλόγησεν αὐτὰ ὁ Θεός, λέγων· αὐξάνεσθε καὶ πληθύνεσθε καὶ πληρώσατε τὰ ὕδατα ἐν ταῖς θαλάσσαις, καὶ τὰ πετεινὰ πληθυνέσθωσαν ἐπὶ τῆς γῆς.

23 καὶ ἐγένετο ἑσπέρα καὶ ἐγένετο πρωΐ, ἡμέρα πέμπτη.

24 Καὶ εἶπεν ὁ Θεός· ἐξαγαγέτω ἡ γῆ ψυχὴν ζῶσαν κατὰ γένος, τετράποδα καὶ ἑρπετὰ καὶ θηρία τῆς γῆς κατὰ γένος. καὶ ἐγένετο οὕτως.

25 καὶ ἐποίησεν ὁ Θεὸς τὰ θηρία τῆς γῆς κατὰ γένος, καὶ τὰ κτήνη κατὰ γένος αὐτῶν καὶ πάντα τὰ ἑρπετὰ τῆς γῆς κατὰ γένος αὐτῶν. καὶ εἶδεν ὁ Θεός, ὅτι καλά.

26 καὶ εἶπεν ὁ Θεός· ποιήσωμεν ἄνθρωπον κατ᾽ εἰκόνα ἡμετέραν καὶ καθ᾽ ὁμοίωσιν, καὶ ἀρχέτωσαν τῶν ἰχθύων τῆς θαλάσσης καὶ τῶν πετεινῶν τοῦ οὐρανοῦ καὶ τῶν κτηνῶν καὶ πάσης τῆς γῆς καὶ πάντων τῶν ἑρπετῶν τῶν ἑρπόντων ἐπὶ γῆς γῆς.

27 καὶ ἐποίησεν ὁ Θεὸς τὸν ἄνθρωπον, κατ᾽ εἰκόνα Θεοῦ ἐποίησεν αὐτόν, ἄρσεν καὶ θῆλυ ἐποίησεν αὐτούς.

28 καὶεὐλόγησεν αὐτοὺς ὁ Θεός, λέγων· αὐξάνεσθε καὶ πληθύνεσθε καὶ πληρώσατε τὴν γῆν καὶ κατακυριεύσατε αὐτῆς καὶ ἄρχετε τῶν ἰχθύων τῆς θαλάσσης καὶ τῶν πετεινῶν τοῦ οὐρανοῦ καὶ πάντων τῶν κτηνῶν καὶ πάσης τῆς γῆς καὶ πάντων τῶν ἑρπετῶν τῶν ἑρπόντων ἐπὶ τῆς γῆς.
